

Letter Opener

The MULTO 3066 automatic letter opener is an extremely productive machine that can overcome any amount of demands. It cuts and removes up to 1/8" of the envelope edge, preventing damage to the contents and materials. The cutter creates a soft opening, preventing any paper cuts while allowing for a much easier access.

The 3066 letter opening machine features two running motors, which provides superior performance and a longer-lasting life. With its easy and simple operation, the 3066 model ensures all tasks are done in a timely fashion providing the premium finish.

Milling Cutter Technology

Protects the contents from being cut or damaged. Removes up to 1/8" of the envelope edge. The removed material is in the form of tiny chips, which are deposited in the waste bin. Creates a soft, feathered edge opening which prevents paper cuts and gives easy access to the contents.

Mixed Thickness Separator

This separator design ensures that only one envelope passes through the machine at a time maximizing separation and improving cut quality.

High Speed

Opens up to 28,000 envelopes per hour. Opens mixed mail, from the smallest to the largest, completely. Opens up to 1/4" thick envelopes. Entire system built to handle large flats and envelopes.

Simple and Reliable

High degree of operational reliability.

Heavy Duty

Solid metal construction throughout. Made of steel using the highest quality of components. Has two motors for better performance and a longer life.

Additional Features

Handles a stack up to 100 envelopes at a time
Removes up to 1/8" of the envelope edge
Solid metal construction throughout
Removed waste is collected in the waste bin

Specifications

Speed: 28,000/hour (#10 envelope)
Load Capacity: Approx. 100 envelopes
Envelope Size: All sizes and types.
Envelope Thickness: Up to 1/4"
Depth of Cut: 0 (no cut) up to 1/8"
Receiving Tray Capacity: Approx. 100 envelopes
Stand and Waste Bin: Included
Power: 120VAC - 2.65A or 230VAC - 1.25A
Dimensions: 42" W x 30" D x 42" H
Weight: 220 lbs.
